

Ted Kubongo

Calgary, AB, Canada | 587-439-6713 | tedkubongo07@gmail.com | Bilingual: English / French

SUMMARY

AI automation and digital transformation practitioner with 3+ years of enterprise delivery experience across consulting and large-scale operations. Combines full-stack AI build capability (Python, FastAPI, Anthropic Claude API, agentic workflows) with deep supply chain domain expertise from working inside one of Canada's largest retail organizations. Founded KAI Technologies to deliver fixed-fee AI automation engagements to mid-market clients, shipping five production-grade products. Equally fluent in discovery-to-delivery consulting cycles and internal transformation initiatives. Executive-level communicator. Bilingual (English/French). Microsoft AI and Machine Learning certified.

CONSULTING EXPERIENCE

AI Solutions Architect

2024 – Present

KAI Technologies | Calgary, AB

AI automation consultancy delivering fixed-fee build engagements to mid-market clients. End-to-end delivery ownership across discovery, solution architecture, build, deployment, and client training.

- Led discovery engagements with operations-heavy mid-market clients to diagnose manual workflow debt and architect targeted AI automation solutions with documented ROI.
- Designed and delivered OpsAnalyst, an AI-powered operational analytics platform generating executive-ready KPI dashboards and diagnostic summaries from complex enterprise datasets.
- Built ProcureIQ, an AI procurement intelligence platform automating vendor benchmarking, cost analysis, and supply chain risk scoring for procurement decision-makers.
- Developed DocuExtract AI, a document intelligence engine extracting and structuring data from unstructured invoices, contracts, and records at scale using NLP.
- Delivered AI Contract Reviewer identifying risk clauses, obligations, and anomalies with structured summaries for legal and procurement stakeholders.
- Architected OnboardIQ, an HR intake and onboarding workflow automation tool reducing manual processing and data validation overhead.
- Consulting model: discovery-first fixed-fee builds with post-build advisory retainer; ICP is 50 to 200 employee firms with high manual workflow volume in professional services, logistics, and operations.
- Stack: Python 3.11, FastAPI, Anthropic Claude API, Chart.js, pandas, openpyxl; full backend-to-frontend deployment on each product.

ENTERPRISE EXPERIENCE

Supply Chain Data Analyst

Jan 2024 – Present

Loblaw Companies Ltd. | Brampton, ON

- Served as internal analytics and automation consultant to supply chain and operations teams, identifying inefficiencies and delivering Python, SQL, and VBA solutions reducing manual work by 10+ hours per week.
- Built AskRO, a fully Microsoft 365-native team metrics dashboard (Power BI, Power Automate, Copilot Studio, SharePoint, Microsoft Lists) with drill-downs, automated manager email summaries, aged-ticket alerts, and an AI-powered search assistant.
- Advised senior leadership on data strategy by developing KPI dashboards and executive-facing reporting tools translating complex supply chain data into clear decision-support outputs.
- Engineered a FastAPI middleware integration connecting a legacy FaaS Excel workflow to Blue Yonder's TMS, eliminating manual reconciliation and enabling real-time data flow across a five-layer architecture.
- Architected a dual-TMS shipment status synchronization solution (Blue Yonder and TruckMate) using OpenText as EDI broker, resolving a longstanding cross-system data conflict.
- Investigated and resolved system issues affecting replenishment logic, inventory discrepancies, and approval workflows across SAP and integrated platforms.
- Trained cross-functional teammates and authored documentation to drive adoption of new analytics tools and automated workflows.

Specialist

Aug 2024 – Present

Apple | Calgary, AB

- Delivered consultative technology recommendations to business and individual clients; reinforced executive communication and advisory skills in a high-volume customer-facing environment.
