

Ted Kubongo

Calgary, AB, Canada | 587-439-6713 | tedkubongo07@gmail.com | Bilingual: English / French

Summary

Applied analytics and AI practitioner with 3+ years of experience designing and deploying AI-driven tools, automation systems, and analytics solutions in complex operational environments. Built five full-stack AI applications spanning procurement intelligence, document processing, operations analytics, contract analysis, and HR workflow automation. Proven ability to translate messy, real-world data into actionable insights and practical decision-support tools for senior leadership and cross-functional stakeholders.

Education

- **Bachelor of Arts**, University of British Columbia *Vancouver, BC*
- **Certificate, AI & Machine Learning**, Microsoft *Calgary, AB*

AI Projects & Applied Solutions (KAITech— Kubongo AI)

Founder & AI Solutions Architect

2024 – Present

KAITech (Kubongo AI) | Calgary, AB

Designed, built, and deployed five end-to-end AI applications targeting SMB and mid-market clients. Each product mirrors industrial and operational use cases directly relevant to supply chain, procurement, compliance, and workforce management:

- **OpsAnalyst**: Operational performance analysis tool ingesting complex datasets and generating AI-driven diagnostic summaries and KPI dashboards for operations leaders.
- **ProcureIQ**: AI procurement intelligence platform automating vendor analysis, cost benchmarking, and supply chain risk assessment with automated reporting outputs.
- **DocuExtract AI**: Document intelligence engine using NLP to extract, classify, and structure data from unstructured operational documents, invoices, and records.
- **AI Contract Reviewer**: Automated contract analysis copilot identifying risk clauses, obligations, and anomalies; produces structured summaries for legal and procurement stakeholders.
- **Employee Onboarding Document Processor**: Workflow automation tool for HR intake, data validation, and onboarding documentation processing.
- **Stack**: Python 3.11, FastAPI, Anthropic Claude API, Chart.js, pandas, openpyxl — full backend-to-frontend deployment on each product.

Professional Experience

Loblaw Companies Ltd.

Brampton, ON

Supply Chain Data Analyst

Jan 2024 – Present

- Designed and deployed Python, SQL, and VBA automation solutions reducing manual analytical work by 10+ hours per week while improving data quality and reporting accuracy across supply chain operations.
- Developed KPI dashboards and executive-facing reporting tools translating complex replenishment, inventory, and approval data into actionable insights for senior leadership.
- Investigated and resolved system issues affecting replenishment logic, inventory discrepancies, and approval workflows across SAP and integrated platforms.

- Currently designing a team-facing metrics dashboard (Power BI, Power Automate, SharePoint) for ticket volume tracking, workload distribution, and automated manager alerts.
- Trained teammates on tool usage and authored process documentation to scale automation adoption across the team.

Apple

Calgary, AB

Specialist

Aug 2024 – Present
