Calgary, AB • tedkubongo07@gmail.com • 587-439-6713 • tedkubongo7.github.io/Portfolio • Bilingual: EN / FR

SUMMARY

AI solutions and automation specialist with 3+ years of end-to-end experience identifying high-value use cases, building agentic workflows, and embedding AI into customer-facing processes without requiring deep software engineering. Hands-on with prompt engineering, LLM APIs (Claude API, Azure OpenAI), RAG patterns, and workflow orchestration — translates business needs into working automations and tracks performance against real usage data. Comfortable bridging strategic and technical conversations: presents AI program outcomes to executive stakeholders while configuring the underlying agent logic and integrations. Founder of KAI Technologies, an AI automation consultancy delivering client-facing automation builds. Microsoft AI and Machine Learning certified, with foundational project management training. Bilingual (EN/FR).

PROFESSIONAL EXPERIENCE

KAI Technologies

2024 – Present

Founder & AI Solutions Consultant • Calgary, AB

- Identified high-value AI and automation use cases for client engagements: diagnosed manual, repetitive workflows, matched them to agentic automation patterns, and built working solutions using LLM APIs and prompt engineering rather than custom production software.
- Designed and delivered a full CRM and outreach automation platform for a healthcare staffing client (FastAPI, Claude API, Gmail OAuth, 964-facility database): client reached more prospects in early 2026 than in the prior 12 years combined — a direct customer-lifecycle adoption and efficiency outcome.
- Built ReachIQ, a multi-agent AI platform (researcher, drafter, fit-scorer in sequence): designed and iterated on prompt engineering strategies for each agent, compressing a full lead research and qualification cycle to under 20 minutes end-to-end.
- Built feedback loops and evaluation checkpoints into deployed agents to continuously refine output quality based on real-world usage, and maintained a working prompt and output-schema changelog across iterations.
- Established responsible AI governance frameworks for every production build: data privacy boundaries, access controls, hallucination risk mitigations, and explainability documentation before any deployment — critical judgment for customer-trust-sensitive environments.
- Defined and tracked efficiency and engagement metrics across all engagements — time saved, adoption rates, and process cycle improvements — and translated findings into stakeholder-facing performance dashboards and recommendations.
- Deployed five production AI products across client verticals: OpsAnalyst (KPI dashboards), ProcureIQ (vendor benchmarking), DocuExtract AI (document NLP), ContractIQ (clause identification), OnboardIQ (HR intake automation).
- Evaluated new market verticals for the consultancy through structured industry research and problem-prioritization frameworks, screening candidate niches for recurring-revenue automation opportunities ahead of client outreach.

Loblaw Companies Ltd.

Jan 2024 – Present

Supply Chain Data Analyst • Calgary, AB

- Managed end-to-end delivery of AskRO, a Microsoft 365-native AI platform (Power BI, Power Automate, Copilot Studio, SharePoint): reduced manual reporting overhead by 10+ hours/week, automated manager summaries, and introduced an AI-powered search assistant — zero external infrastructure.
- Managed end-to-end delivery of WestWave, an intermodal operations platform replacing a shared Excel tracker managing ~500 loads/month across 10+ users: eliminated 4+ hours of daily manual work per user, modeled full load lifecycle and financial reconciliation including fuel surcharges and detention billing.
- Leading a new initiative to centralize automated promotion-change email reporting — currently siloed to a handful of recipients — into a shared, analyst-accessible system (Power Automate, SharePoint, Power BI), including resolving a missing buyer-number cross-reference against item-level master data.
- Built and maintained performance dashboards (Power BI) translating operational and efficiency data into actionable recommendations for leadership, including the Chief of Supply Chain and CAO.
- Built and presented AI investment business cases to senior leadership: modeled cost savings, surfaced previously invisible detention exposure, and enabled load-level accounts receivable tracking.
- Partnered cross-functionally across SAP, Blue Yonder TruckMate TMS, and SharePoint to integrate automation into core operational workflows; navigated enterprise IT governance, access controls, and data privacy requirements throughout.
- Communicated product strategy and analytical findings to stakeholders from frontline operators to the CAO; delivered Python, SQL, and VBA solutions reducing manual work by 10+ hours/week.

TECHNICAL SKILLS

AI & Prompt Engineering: Anthropic Claude API, prompt engineering and iteration, RAG patterns, multi-agent orchestration, LLM integration (Claude API, Azure OpenAI), output evaluation and feedback loops, responsible AI governance

Workflow Automation & Integration: Agentic workflow design, API and webhook integrations, FastAPI, low-code/no-code orchestration, Power Automate, Microsoft Power Platform, Copilot Studio, data flow management across enterprise systems

Analytics & Reporting: Power BI, KPI and efficiency metric design, adoption and engagement tracking, performance dashboards, business case development, ROI modeling

Project Delivery: End-to-end project ownership, cross-functional stakeholder coordination, requirements gathering, project documentation, delivery tracking against business outcomes

Languages & Platforms: Python (FastAPI, pandas, openpyxl), SQL (Oracle, T-SQL), JavaScript, VBA, Microsoft 365, SAP, Azure AI, GitHub, Railway

EDUCATION & CERTIFICATIONS

Microsoft AI and Machine Learning Certificate • Online • 2024
Google Foundations of Project Management Certificate • Online
IBM DevOps and Software Engineering Professional Certificate • Online • In Progress
University of British Columbia • Bachelor of Arts • Vancouver, BC • 2017 – 2021

COACHING & LEADERSHIP

Hilltoppers Football Club <i>Running Back Coach / Run Game Coordinator • Calgary, AB</i> Design and coordinate the full run game: weekly game planning, scheme installation, and in-game adjustments. Mentor running backs through individual film review, technique development, and performance feedback.	2022 – Present
Notre Dame High School <i>Running Back Coach • Calgary, AB</i> Deliver position coaching and player development at the high school level; mentor student-athletes on the habits and discipline required to earn post-secondary athletic opportunities.	2022 – Present
University of Saskatchewan / UBC / University of Maine <i>D1 Varsity Football, Running Back • Canada & USA</i> Canada West All-Star, Hardy Cup Champion, and Academic All-Canadian across three Division 1 programs.	2017 – 2021
