SUMMARY

AI enablement and business transformation specialist with 3+ years of experience managing end-to-end AI workflow design, adoption programs, and measurable operational improvement across technical and non-technical teams. Combines hands-on agentic AI capability with a consulting mindset: identifying high-value use cases, building governance frameworks, tracking KPIs, and bringing people through change. Track record of creating playbooks, training materials, and enablement resources that move organizations from ad hoc AI experimentation to scalable, governed adoption. Founder of KAI Technologies. Microsoft AI and Machine Learning certified. Bilingual (EN/FR).

PROFESSIONAL EXPERIENCE

KAI Technologies

2024 – Present

Founder & AI Enablement Lead • Calgary, AB

- Managed end-to-end AI enablement engagements from use case discovery through deployment and adoption: led process mapping sessions, designed automated workflows, built production systems, and trained client teams — with measurable outcomes tracked at every stage.
- Designed and delivered a full CRM and outreach automation platform for a healthcare staffing client: FastAPI backend, Claude-powered email drafter, Gmail OAuth integration, and a normalized database of 964 Alberta facilities — client reached more prospects in early 2026 than in the prior 12 years combined.
- Built ReachIQ, a multi-agent AI workflow platform (researcher, drafter, and fit-scorer agents in sequence): compressed a full lead research and outreach cycle to under 20 minutes end-to-end, demonstrating repeatable agentic AI impact at production scale.
- Built and delivered AI adoption playbooks, prompt libraries, training materials, and hands-on enablement sessions for non-technical client teams — ensuring staff could apply AI to their specific work independently after deployment.
- Established practical AI governance frameworks for every client engagement: defined data privacy boundaries, access controls, hallucination risk mitigations, and responsible use guidelines before any production build began.
- Tracked and reported KPIs and business outcomes for all deployed solutions: quantified time savings, process cycle improvements, and adoption rates to demonstrate ROI and guide continuous improvement.
- Deployed five production AI systems across client verticals: OpsAnalyst, ProcureIQ, DocuExtract AI, ContractIQ, and OnboardIQ — each designed around a specific high-value workflow gap identified during discovery.

Loblaw Companies Ltd.

Jan 2024 – Present

Supply Chain Data Analyst • Calgary, AB

- Managed end-to-end design, deployment, and adoption of WestWave, a workflow modernization platform replacing a shared Excel tracker managing ~500 loads/month across 10+ users: eliminated 4+ hours of daily manual update and review work per user, standardized operating processes, and trained the full user base on the new system.
- Managed end-to-end delivery and adoption of AskRO, a Microsoft 365-native AI enablement platform (Power BI, Power Automate, Copilot Studio, SharePoint, Microsoft Lists): reduced manual reporting overhead by 10+ hours/week, unified fragmented reporting into a governed source of truth, and drove adoption across a cross-functional operations team.
- Drove AI and automation adoption across supply chain, finance, and operations functions: authored adoption documentation, delivered hands-on training, built prompt libraries, and created repeatable frameworks enabling teams to self-serve.
- Owned automated KPI reporting pipeline replacing a manual monthly reconciliation process: cut reporting cycle time from days to hours and provided leadership with consistent, trusted performance visibility.
- Communicated transformation initiatives and analytical findings to stakeholders from frontline operators to the Chief of Supply Chain and CAO; translated complex technical designs into clear business value narratives.
- Delivered Python, SQL, and VBA automation reducing manual work by 10+ hours/week; integrated across SAP, Blue Yonder TruckMate TMS, and SharePoint within an enterprise IT governance environment.

TECHNICAL SKILLS

AI Enablement & Governance: Agentic AI design, LLM integration (Claude API, Azure OpenAI), RAG pipelines, prompt engineering, AI adoption playbooks, responsible AI governance, hallucination and data privacy risk management

Workflow & Automation: Process mapping, workflow orchestration, Power Automate, REST APIs, webhooks, iPaaS automation, FastAPI, Copilot Studio

Analytics & Reporting: Power BI, KPI dashboard design, performance reporting, adoption metrics, business case development, ROI modeling

Languages & Platforms: Python (FastAPI, pandas, openpyxl), SQL (Oracle, T-SQL), JavaScript, VBA, Microsoft 365, SAP, Azure AI, GitHub

Consulting & Change: End-to-end project ownership, discovery facilitation, as-is/to-be process design, stakeholder engagement, training delivery, enablement documentation

EDUCATION & CERTIFICATIONS

Microsoft

2024

AI and Machine Learning Certificate • Online

University of British Columbia

2017 – 2021

Bachelor of Arts • Vancouver, BC

COACHING & LEADERSHIP

Hilltoppers Football Club

2022 – Present

Running Back Coach / Run Game Coordinator • Calgary, AB

- Coordinate the full run game as play-caller and position coach: design weekly game plans, install schemes, and manage in-game adjustments for a competitive Calgary club program.
- Mentor and develop running backs individually through film review, technique coaching, and performance feedback — while managing the broader offensive system as run game coordinator.

Notre Dame High School

2022 – Present

Running Back Coach • Calgary, AB

- Coach running backs at the high school level: deliver position-specific technique instruction, support player development, and contribute to offensive game planning alongside the coaching staff.
- Mentor student-athletes on performance, discipline, and the habits that bridge high school sport to post-secondary opportunities — drawing on personal experience earning D1 scholarships across three programs.

University of Saskatchewan / UBC / University of Maine

2017 – 2021

D1 Varsity Football, Offensive Line • Canada & USA

- Canada West All-Star, Hardy Cup Champion, and Academic All-Canadian across three Division 1 programs. Earned starts and accolades at each program while maintaining academic excellence and leadership on and off the field.
